

COMPANY PROFILE

About Achelab

ACHELAB, is an ISO 17025:2017 accredited laboratory offering Quality Analysis and Control services in various sectors including Water and Waste water, Pharmaceutical, Environmental, Food and Agriculture.

VISION

Our aim is to be recognized internationally as a laboratory providing world-class scientific services.

MISSION

Provide innovative, timely, and quality laboratory services that will assure excellence and reliable lab testing services.

Our laboratory is highly equipped with the latest equipment, with a dedication to accuracy and service that earns the trust of thousands of customers worldwide.

Our **Core Business**

We offer analytical testing in:

Water & Waste Water Analysis

We offer a complete water and waste water analysis including full chemistry, heavy metals, physical and microbiological analysis. The results are compared against Kenyan Standards, NEMA guidelines, AAMI and World Health Organization Standards.

Pharmaceutical Analysis

We undertake raw material and finished product analysis as per the International Standards (British Pharmacopoeia and United States Pharmacopoeia).

Agriculture Analysis

Our range of agricultural analysis include animal feeds, macro and micro nutrients in fertilizers, soil analysis and plant analysis.

Food Analysis

We offer food analysis in processed foods, oils, fortified foods and condiments for both chemical and microbiological parameters as per the Kenyan/East African Standards.

Hygiene Analysis

We conduct personnel swab analysis and environmental plate count testing to determine the external and internal elements of contamination that can affect any organization's performance.
